BETTER FEED QUALITY EQUALS MORE MILK PRODUCTION

"Your forage is the key to production. Our haylages have tested really well and we're getting a consistent cut. Shredlage is right where it's supposed to be and our shaker tests are all coming out. Our production has significantly increased. The consistency in the feed is outstanding."

*Fustead Holsteins,
Wausau*

New Holland's Commitment

The NEW FR Forage Cruiser self-propelled forage harvesters offer innovation and productivity in a five-model line from 476 right up to 824 horsepower. New Holland has married industry-leading chopping and crop processing performance with outstanding operator comfort and new, efficient engine packages to help you make the most of your harvest.

Ultimate Capacity

New Holland knows that throughput is king where forage harvesters are concerned, and that owner/operators measure in tons per hour. The largest cutterhead in the business offers exceptionally high levels of inertia, and when combined with lots of cutting space, throughput and accuracy are guaranteed.

Uncompromised throughput is the priority in forage cruiser design to maximize tons per hour.

Best in Class Chop Quality

It's a bold statement, but the NEW FR Forage Cruisers more than lives up to the title. Industry-leading HydroLoc™ technology ensures constant chop length regardless of crop type and variations in load. But, quality is nothing without throughput, and with the industry's widest and largest crop channel from feedrolls to spout flipper, the FR models yield a thin, controlled crop mat for best-in-class chop quality.

Ultra-Efficient Crop Processing

No matter which FR model you choose, you get industry-leading New Holland processing efficiency. Large 10-inch (250-mm) processing rolls are a full 30 inches wide — the widest available. Wider rolls mean more crop can fit through the small gap for maximum capacity. Maximum throughput, consistent chop length and efficient crop processing gives you all the right ingredients for chopping the highest quality feed.

Low operating costs

Fuel-efficient engines and easy maintenance lowers your operating costs for higher profits. Removable panels and fully-opening shields allow easier access to maintenance points and the new under-shield lighting makes nighttime maintenance and clean up easier.

OUR COMMITMENT TO OUR CUSTOMERS IS KEY

Team Swiderski's Commitment

As an industry leader, Swiderski Equipment continues to focus on providing the best service possible to our customers by meeting their needs and exceeding their expectations. That commitment to our customers, along with in-depth training and advanced knowledge in hay & forage production and forage harvester set-up, has resulted in a team of experts ready to partner with you to maximize your harvest and boost your operation's profitability.

Money in the bank

We know feed quality is the key to production for any operation. Forage quality drives your herd's health and production. Our goal is to help you put more money to your bottom line with higher feed quality and lower production costs.

Done right the first time

You live with your feed for 12 months and only get one shot to maximize quality at harvest. Our forage specialists are experts in harvester set-up and take time to understand your operation's feeding goals. We ensure the machine is set-up properly from the get-go, helping you maximize crop harvest and storage.

"Fuel efficiency has been huge for us. We've seen a significant increase in fuel efficiency and the serviceability of the machine is very easy. We went over 2 years with virtually no downtime, so that's big. We've also seen a dramatic increase in consistent chop quality. We've had nutritionists say it's some of the best feed they've seen."

FAST & EFFICIENT SERVICE. WE SET THE STANDARD.

There is no time for downtime.

Our extensively-trained service techs understand the importance of getting your machine back up and running as quickly as possible. With New Holland factory training and experience second to none, we provide our customers unparalleled 24-hour service support through chopping season.

Service and parts when you need them.

Our parts departments are ready and stocked with the parts you need across our stores.

With back-up machines on-hand through the season, we're able to get you running as quickly as possible in unforeseen breakdowns.

**Service
you can
rely on
when you
need it
most.**

Our goal is to keep you up and running from the start to maximize your harvest and profits.

"Length of cut has been the biggest thing for us with the FR. It's simple to adjust the cut length on the go. Downtime is critical when chopping and it's been almost non-existent for us. Even when we did have issues, the service techs from Swiderski Equipment were here within a couple of hours to get us back up and going."
